

## WALL STREET

Market Closing—While market did not develop much activity, stocks were fairly firm in late afternoon, and a number of them had recovered from the mid-day dip. The liquidation was expected to be close to the top, although still another raid would not surprise anybody. One market observer claimed that about 5000 shares of steel were traded in within a range of half a point.

There was little of interest at the close. Traders had no difficulty in covering short contracts. Prices were a little above the low point, but final prices showed a net loss in Steel common of 1-1/2, in preferred 1-1/4 and in Union Pacific 1-3/4. Reading 1-1/4, with the general list losses ranging from 1-2 to 1-5/8. Total sales, 309,324 shares.

Trading—The new week started in with an undisturbed price of nearly all the important issues showing substantial losses in the initial trading. The attention attracted to the tariff schedules had a good deal to do with the reluctance of some important interests to offer opposition to bear selling, while reacting of steel orders made efforts to bring about declines successful for the time.

Union Pacific, Steel and Reading ranged about 1 point under Saturday's final prices, and fractional losses were sustained in many issues. Canadian Pacific yielded 1-5/8, and all during the first hour the market was active and prices gave way to the heavy selling, going off slowly, while showing some resistance, but yielding to pressure.

In the absence of aggressive support by the larger interests market continued active and weak, commission houses were reported as doing a large business.

In the second hour Union Pacific led in a slight rally which was feeble in the other stocks, the general list kept

around the lower level, Union Pacific sold down to 156 1/2, and recovered to 157 1/2. St. Paul lost 2 points at 107, Steel 1 1/2 at 106 1/2, and the preferred 1 1/4 at 106 1/2. American Can issues were strong. Steel at 104 1/2 shows a decline of 10 points from the September high.

In the early afternoon a sharp drive drove Steel down to a new low level at 96 1/2. A few stocks also sold off, but as little steel came out prices hardened and started to rally to the extent of 1/4 to 1/2 of a point, with trading on a smaller scale than prevailed during the morning.

## The Closing Quotations.

The following were the highest, lowest and last prices of stocks for today and the net change as compared with yesterday's closing prices.
